**Re:** **Lw11059 Family of Cameras Product Modification Notice**  
**Introducing New Camera Boards Due To Manufacturer Obsolescence**  
**Product News #10-Ind-02**

---

Due to a manufacturer's part obsolescence, the Lw11059 family of megapixel USB 2.0 cameras (Lw11059, Lw11058 and Lw11057) will be modified to include a new camera board.

Over the next few weeks, Lumenera will begin transitioning to the new camera models. Although camera features and performance will not be affected by this modification, a new camera driver (included with camera purchase) will be required to support the new interface boards. These new drivers will support both the new and old camera versions. Customers will be able to distinguish the new cameras by an updated revision on the USB board that can be read programmatically from the camera and by the removal of the cooling fan.

All orders currently pending will be processed with the current version of Lw11059 camera until our stock of this version runs out. Once this happens, we will modify all pending orders to use the new "B" variant.

Ordering Information as of December 3, 2010:

- Pricing for the new models will not change from the current pricing.
- Product names and ordering part numbers have been modified as follows:

Camera Description	Previous Part Number	New Part Number
10.7 MP Canon-mount enclosed color camera	Lw11059C	<b>Lw11059CB</b>
10.7 MP Canon-mount enclosed monochrome camera	Lw11059M	<b>Lw11059MB</b>
10.7 MP K-Mount enclosed color camera	Lw11058C	<b>Lw11058CB</b>
10.7 MP K-Mount enclosed monochrome camera	Lw11058M	<b>Lw11058MB</b>
10.7 MP F-Mount enclosed color camera	Lw11057C	<b>Lw11057CB</b>
10.7 MP F-Mount enclosed monochrome camera	Lw11057M	<b>Lw11057MB</b>

Sample product suitable for testing is now available.
