Re: **IR/AR Filter Upgrade in Lumenera's Lt Camera Models**

Effective July 4, 2016 Lumenera will begin transitioning the current IR filter in its color USB 3.0 Lt camera models listed below:

- Lt225C
- Lt225C-SCI
- Lt365RC
- Lt365RC-SCI
- Lt365RC-SCI-WOU
- Lt425C
- Lt425C-SCI
- Lt425C-SCI-WOU
- Lt665RC
- Lt665RC-SCI
- Lt965RC
- Lt965RC-WOCG-WOG

Currently these models only have an **IR** coating, and we will be transitioning to a new filter that has an **IR/AR** coating. This filter change will improve the camera's sensitivity, with an approximate 5% increase in transmittance.
